

Are Botox Injections Safe?

As we grow up day-by-day many types of physical changes occurs in our body. Some of them are visible like: - Skin lines, Wrinkles, Muscular disorders etc.

Now in modern technology researchers also find the solution of this problem. According to their research, they suggest the **Botox Injection Treatment** for wrinkles and muscular disorders. But they also tells us that when this injection injected into your body, may be this treatment is not stay for a longer period of time.

So first we should know about the **Botox**. It is a special type of drug which is used for Facial Treatment like - erasing of wrinkles and skin lines problem, by injecting it into the body.

Now a days Botox Injection treatment becomes very populous among the peoples. Doctors also use this treatment generously. They consider this as a safe and harmless treatment. This is a temporary solution for the people who are suffering from the problem of skin lines, wrinkles and muscular disorders.

Risks of the Botox Injection

It is a quite safe and harmless treatment. But you should always consult with the experienced one before having this treatment.

If you visits someone who does not know about the Botox [facial injection](#) and the procedure of injecting it into the body then, you may experience some unwanted skin related problems like- allergy, itching, dryness of skin, red welts etc.

Working of Botox Injection

After injecting the Botox Injection, which is [facial injection](#) by nature, it enters into the nerve and blocks some signals of the nerve of muscles. Then the muscles become relax and then minimizes the wrinkles and skin lines problems on the face.

How long Botox Stay

Botox first blocks the nerves signal and then freezes the movement of the muscles. This stays about 3 or 4 Months only. If you want to look wrinkle free and flawless then you have to avail this treatment two to three times in a year. Once it injected the difference is visible within few hours.

Side Effects to Botox

It has a very minimal side effect. If someone take this from expert person with a proper doze then is quiet rare that anyone faces any vital problem. If it is not properly done then swelling, irritation and redness around the injected area occurs. Few people experiences fatigue, headache and migration problem as well.

What happens if you stop Botox?

If you decide to discontinue the treatment then again wrinkles problem, skin loosing and skin lining problem occurs. The affected area and skin ageing process again functioning in a normal way.

Cost of Botox Treatment

The cost of Botox [facial injection](#) always fluctuates. Mostly it depends on the number of affected area and how the expert person has more experience on it. Some practitioner charges on the number of units and it also depends on the zone area. Charges vary from one place to another place. Mostly it charges approximately \$250 - \$350 depending upon the awareness of the people.
